WHY YOU SHOULD CARE

70%

Over 70% of people age 18-64 can benefit from a prescription savings card due to increasing costs of high deductible health plans, high copays and being underinsured.

40%

40% of the top ten prescription drug costs have increased by over 100%, while prescription benefits are decreasing rapidly.

30

The average family of four gets over 30 prescriptions per year. Many of those prescriptions are either not covered or too expensive on their health plans.

Most of your members are already using an RX savings card; you're just not getting credit for it.
